

Poultry Farm Management System Manual

PFMS is a desktop-based software application to aid poultry farmers in record keeping, monitoring and report generation.

Configuration and Data

- Use 'Entry' -> 'Initial Records' menu to enter configuration such as breed type, supplier, sale item, customer, expense type and etc.
- Start with "Hatchery" tab to enter records of eggs and new chicks produced before saving to the flock management tab and proceed to Query hatchery, treatment and mortality after insertion of the same data as well as View Ledger report.
- Use 'Tools' to change username and password upon logging in.
